EDUCATION

SR University

Bachelor of Technology in Computer Science and Engineering (CGPA: 9.68)

Warangal, India

Aug. 2023 – May 2027

- **Coursework:** Data Structures, Operating Systems, Design and Analysis of Algorithms, Database Management Systems, Discrete Mathematics, Theory of Computation.

Sri Chaitanya Junior College

Intermediate Education, TSBIE (CGPA: 9.45)

Bowrampet, India

June 2021 – Mar. 2023

EXPERIENCE

Alassa Technology Solutions Pvt. Ltd.

AI Intern

Remote

Jun. 2026 – Jul. 2026

- Engineered core feature updates and resolved critical bugs for an AI-driven viva and mock interview platform, enhancing system stability across frontend and backend services.
- Optimized authentication, scheduling workflows, and voice-agent functionality by troubleshooting complex API issues using Next.js, NestJS, FastAPI, and Redis.
- Collaborated with the development team to isolate system anomalies and validate technical fixes, ensuring seamless end-to-end performance of the viva evaluation bots.

EduSkills Academy

Java Full Stack Intern

Remote

Dec. 2025 – Mar. 2026

- Completed an intensive 10-week technical program focused on enterprise-grade Java full-stack web architectures.
- Developed responsive frontend interfaces using HTML, CSS, and JavaScript, helping scale tools serving **500+ active users**.
- Built robust backend microservices using **Core Java, Spring Framework, and Spring Boot** to optimize system data processing.
- Integrated MySQL databases using Hibernate ORM and managed deployment cycles via Git and GitHub version control.

PROJECTS

FullStack Compass | React, Vite, Node.js, Express, MongoDB, Vercel | 🌐 GitHub | 🌐 Live

- Developed a comprehensive **Single Page Application (SPA)** using React and Vite covering 13+ technologies from HTML fundamentals to production deployment with 20+ deep-dive topic pages.
- Built a custom **floating TOC scrollbar** using requestAnimationFrame, IntersectionObserver, and ReactDOM.createPortal — replacing the native browser scrollbar with a pill that tracks scroll position and highlights active sections in real time.
- Implemented dynamic client-side routing with **React Router v6**, progress tracking via **React Hooks**, and deployed globally on **Vercel's Edge Network** achieving near-instant page transitions.

SyncLeetX | JavaScript, Chrome Extension API, GitHub API | 🌐 GitHub

- Developed a Chrome Extension that automatically serializes and syncs accepted LeetCode and GFG solutions to GitHub.
- Built a **serverless developer dashboard** featuring automated README generation, daily coding streaks, and live sync tracking.
- Utilized Monaco/Ace editor data extraction to structure repositories cleanly by problem difficulty without requiring an external backend.

Campus Reporting System | React, Node.js, Express, MongoDB, JWT | 🌐 GitHub | 🌐 Live

- Built a **full-stack complaint management platform** with isolated dashboards using the MERN stack.
- Implemented secure token-based JWT authentication and RESTful APIs to handle cross-origin routing seamlessly.
- Engineered strict role-based access control (RBAC) to dynamically assign views across Admin, Faculty, Student, and Worker fields.

Shoe Mart Inventory & Billing System | C Programming

- Developed a comprehensive menu-driven application in C to handle product selection, real-time inventory tracking, and automated billing workflows.
- Engineered robust procedural logic utilizing structs, pointers, and dynamic memory allocation to optimize data processing and system performance.
- Implemented persistent file handling operations to securely store transactional records and maintain accurate stock levels across user sessions.

SKILLS

Competitive Programming : Solved **400+ DSA problems** on LeetCode with a strong emphasis on core algorithms.

Languages : Java, C, C++, Python, SQL, JavaScript, HTML/CSS

Frameworks & Web : Spring Boot, Spring, Node.js, Express.js, Hibernate, React, AngularJS, jQuery, Ajax

Databases & Tools : MySQL, MongoDB, Oracle, Git, GitHub, JDBC, Render, Apache Tomcat

Certifications : C Programming (NPTEL, IIT Kanpur), Fundamentals of Deep Learning (NVIDIA)
