EDUCATION

SR University

Bachelor of Technology in Computer Science and Engineering (CGPA: 9.68)

Warangal, India

Aug. 2023 – May 2027

- **Coursework:** Data Structures, Operating Systems, Design and Analysis of Algorithms, Database Management Systems, Discrete Mathematics, Theory of Computation.

Sri Chaitanya Junior College

Intermediate Education, TSBIE (CGPA: 9.45)

Bowrampet, India

June 2021 – Mar. 2023

EXPERIENCE

EduSkills Academy

Java Full Stack Intern

Remote

Dec. 2025 – Mar. 2026

- Completed an intensive 10-week technical program focused on enterprise-grade Java full-stack web architectures.
- Developed responsive frontend interfaces using HTML, CSS, and JavaScript, helping scale tools serving **500+ active users**.
- Built robust backend microservices using **Core Java, Spring Framework, and Spring Boot** to optimize system data processing.
- Integrated MySQL databases using Hibernate ORM and managed deployment cycles via Git and GitHub version control.

PROJECTS

SyncLeetX | JavaScript, Chrome Extension API, GitHub API | 📁 GitHub

- Developed a Chrome Extension that automatically serializes and syncs accepted LeetCode and GFG solutions to GitHub.
- Built a **serverless developer dashboard** featuring automated README generation, daily coding streaks, and live sync tracking.
- Utilized Monaco/Ace editor data extraction to structure repositories cleanly by problem difficulty without requiring an external backend.

Campus Reporting System | React, Node.js, Express, MongoDB, JWT | 📁 GitHub | 🌐 Live

- Built a **full-stack complaint management platform** with isolated dashboards using the MERN stack.
- Implemented secure token-based JWT authentication and RESTful APIs to handle cross-origin routing seamlessly.
- Engineered strict role-based access control (RBAC) to dynamically assign views across Admin, Faculty, Student, and Worker fields.

Lost and Found Portal | Node.js, Express, HTML/CSS, JavaScript, MongoDB | 📁 GitHub | 🌐 Live

- Built a full-stack web application utilizing Node.js and Express to streamline the reporting, searching, and recovery of misplaced items.
- Engineered secure RESTful APIs and dynamic search/filter functionalities, integrating a responsive client-side UI with a backend database.
- Applied Agile development practices and modular architecture principles to ensure seamless frontend-to-backend data integration and reliability.

Job Tracker Pro | Java Servlets, JDBC, MySQL, Apache Tomcat | 📁 GitHub

- Developed a full-stack job application tracking application adhering to the **Model-View-Controller (MVC) design pattern**.
- Implemented secure session tracking mechanisms, database connection pooling, and multi-user data isolation profiles.
- Engineered complete relational schemas in MySQL to support real-time CRUD data mapping operations.

SKILLS

Languages : Java, C, C++, Python, SQL, JavaScript, HTML/CSS

Frameworks & Web : Spring Boot, Spring, Node.js, Express.js, Hibernate, React, AngularJS, jQuery, Ajax

Databases & Tools : MySQL, MongoDB, Oracle, Git, GitHub, JDBC, Render, Apache Tomcat

Certifications : C Programming (NPTEL, IIT Kanpur), Fundamentals of Deep Learning (NVIDIA)

Competitive Programming : Solved **400+ DSA problems** on LeetCode with a strong emphasis on core algorithms.
